Does anyone know of good shareware that enables use of the MFJ-1278BT
fax, SSTV and graphics modes?

Thanks,

Jack, N4ULS

Subject: BPQ Software / Baycom
To: ham-digital@ucsd.edu

Hi

Is there a version of BPQ around somewhere that will support an external Baycom modem on com1. They all seem to support the card, but not the external version.

Thanks

Kevin

|                                         |  
| I am making my first tnc. Please tell me which communication program |  
| for packet radio is suitable for beginners.                          |  
+-----+
```

I have tried many commercial and shareware! I finally settled on a shareware prog. called - "paKet 5.1" out of Australia! Easy to set up and excellent documentation especially for beginners!

Why don't you just use whatever terminal emulator you have on hand? For example, if you are using MSDOS, I believe the old standby shareware Procomm is still available, and will get you started.

Hello Michael - Just about any terminal program such as Qmodem, Procomm, etc. will do. The tnc does all the "smart" work. The software just manages the data stream between tnc and rs232 port.

Hi All,

I finally contacted the MIR space station.. I am looking to QSL the qso..
What is the QSL info??

Thanks Merry XMas.

And smack dab in the middle of some R/C channels, thank you very much ...

It is Class D CB, so I gess they would be shitting in the mouth that feeds them

Ciao -- Mark

I can't hold 'er capitan, she'sa going down. All I can hear on
the control channel is this funny repeating Breeeeeeaaaaaapppp sound ...
